Evening Brief

Date: Tuesday July 31st, 2018

Weather Summary

*** **High Risk for Lightning Tue-Wed Idaho/NE Nevada/NW UT** ***

*** **High Risk for Gusty Winds/Low RH Thu-Fri Idaho and Nrn UT** ***

Lightning may be ongoing early Wed morning over parts of ID/UT/eastern NV. By Wed afternoon, the lightning threat shifts a little further east with the main threats for drier lightning will be across far NE NV into South Central/Ern ID into Nrn UT. **High Risk for Lightning** has been issued for this lightning event over portions of Southern ID/Northern UT for Wednesday.

Mixed wet/dry or wetter lightning will continue over the southern half of NV/UT and the AZ Strip through Thu/Fri with drier weather pushing across much of the Great Basin briefly later in the weekend.

Stronger winds and drier conditions will move into Wrn NV Wed and spread east across Wrn/Nrn NV into Srn ID Thu-Sat. RH will drop into the single digits to low teens during the afternoon/evening through Sat in these areas with gusts 30-40 mph. Even stronger winds are possible by early next week.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Light Initial Attack Activity
National	5	New Fires and Acres: 25 fires 46.8 acres; 27,095 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

ERC's are still near or below the 50th percentile across the southern third of Nevada, Utah, into the AZ Strip, but even there, drier pockets are beginning to emerge, along with an occasional lightning holdovers, and reemergence of old fires from earlier this season. ERC's are mainly in the 70th to 80th percentile across Northern parts of NV and UT and even drier, across Idaho, where many stations are now at or above the 90th percentile. Wyoming ERC's also steadily rising into the 60th-70th percentiles with locally higher ERC's. Live Fuel Moisture levels across most areas are near late July normals, and grasses are cured in just about all areas, except the highest elevations above 7000 ft. in Idaho and Western Wyoming.

Resources:

Aviation within the Great Basin

- o 0 VLAT's, 5 LATs, 4 CL-415
- o 21 SEATs, 2 Fire Bosses
- o 9 Type 1 Helicopters / 9 Committed
- o 8 Type 2 Helicopters / 8 Committed
- o 22 Type 3 Helicopters

Crews Committed within the Great Basin

- o 8 IHCs Committed / 0 Available
- o 33 T-2 IAs Committed / 0 Available
